

Construction update – Bringelly

22 July 2023

Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the Western Sydney Aerotropolis in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

CPB Contractors Ghella (CPBG) was awarded the tunnelling contract for Sydney Metro – Western Sydney Airport in December 2021.

Construction activities

Tunnelling contractor CPBG continues work over the next two months at the Bringelly services facility site on Derwent Road. Please see the map overleaf for work locations.

Most work will be carried out during standard construction hours **Monday to Friday 7am to 6pm and Saturday 8am to 1pm**. Some out-of-hours work activities will be carried out to mitigate quality and safety risks, and in line with the project Environment Protection Licence, Road Occupancy Licences, and Transport for NSW requirements. Surrounding residents and businesses will be notified in advance of any out-of-hours work.

Out-of-hours work in August and September will include:

- Oversized plant and equipment deliveries and excavated material removal
- Shaft excavation and ground support installation
- Concrete formwork, survey and utility adjustments
- Concrete pours and associated works will occur **up to six days per week from Monday to Friday 6pm to 10pm and Saturday 1pm to 4pm**
- Tunnelling works have commenced at the Airport Business Park Metro Station, progressing to Bringelly. This activity is occurring **24 hours a day, seven days a week**.

Follow the tunnel boring machines progress at sydnymetro.info/journey-sydney-metro-western-sydney-airport-tunnel-boring-machines.

Standard construction hours work in August and September will include:

- Shaft excavation including earthworks, rock bolting and shotcreting
- Concrete works, including installation of steel reinforcement, installation of formwork and pumping of concrete to build the future services facility and various structures
- Water treatment plant operation and dewatering of sediment basin
- Site facilities modifications
- Delivering and removing plant, equipment and excavated material with truck and trailers
- Site photography using drone cameras above the construction site.

Out-of-hours work six-month lookahead:

Activity	Timing
Shaft excavation and ground support installation	August 2023 – January 2024
Concrete work	August 2023 – January 2024
Oversized plant and equipment deliveries, excavated material removal	August 2023 – January 2024
Tunnel boring machine operations reaching Bringelly Services Facility	January 2024

What to expect:

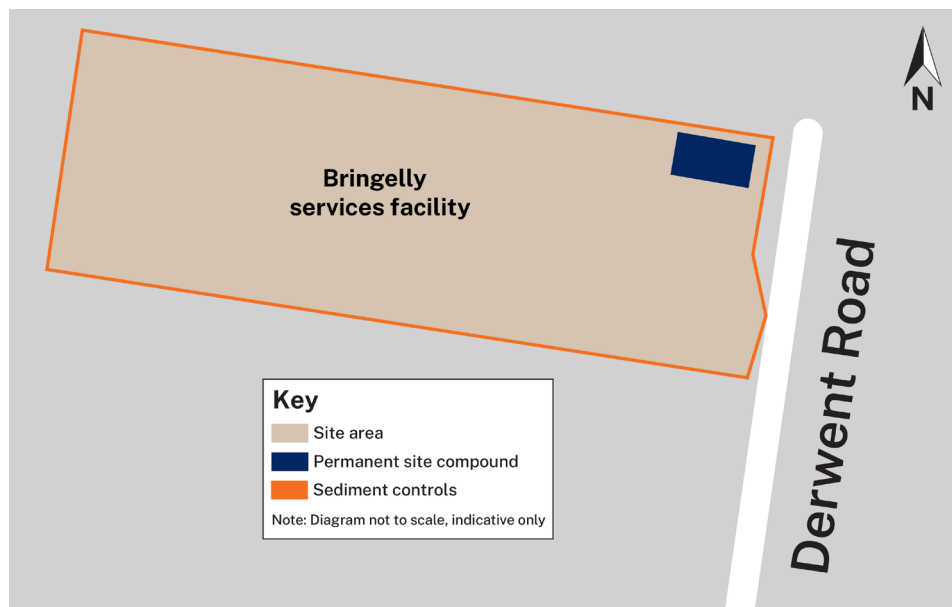

- Work activities will generate noise, vibration, and dust. Mitigation measures will be in place to minimise these impacts including noise and vibration monitoring, respite periods and dust suppression
- Increased worker vehicle movements in and around the work site.

Equipment used:

Includes (but is not limited to) drill rigs, bolting rig, mobile cranes, shotcrete rig, shotcrete pump, excavators and earthmoving equipment, concrete agitators, concrete pumps, vacuum excavation vehicle, heavy vehicles including articulated dump trucks, forklifts, telehandlers, drone cameras, lighting towers, compact rammers, powered hand tools, high pressure washer, water pump, water carts, traffic control devices, utility scanning and survey equipment, and light vehicles.

Changes to traffic, pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include contraflow traffic flow and stop-slow traffic controls. The times of these changes will vary and are dependent on road authority approvals. Access to driveways and buildings will be maintained at all times. Residents will be separately notified if access to driveways will be affected or access to private property is requested.

Feedback

We invite your feedback on appropriate respite periods or mitigation measures that may be required for your specific circumstances. Contact your local Place Manager, Hayley to discuss your preferences or to be added to the distribution list to receive these updates by email

CPBG's Community Communications Strategy is available at cpbcontractors.cc/SBTstrategy. Contact us to provide feedback on this plan.

Thank you for your cooperation while we complete these essential works.
