

Monthly update – Burwood North

29 January 2024

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Sydney Metro has been granted planning approval to construct twin underground rail tunnels between Westmead and Hunter Street in the Sydney CBD for Sydney Metro West. Acciona Ferroviaria Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including Burwood North Station.

Work during February

Bulk excavation has been completed at both the northern and southern sites. The main activities during February will include:

- Tunnel lining work for the crossover cavern west of the station box
- Nozzle formwork removal and lining work at the eastern end of the station box
- Preparatory works for the arrival of tunnel boring machines
- Construction of concrete slabs next to Parramatta Road on the northern site
- Utility work on Burwood and Parramatta roads and Burton and Loftus streets
- Installation, adjustment and removal of fencing, scaffolding and hoarding
- CCTV of sewer and stormwater drains
- Utility work for new driveways and construction of new driveways on both sites
- Delivery and pick up of oversize equipment to and from the northern site

This work will be carried out during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 6pm

Work outside standard construction hours

As previously notified, AFJV will be carrying out utility work progressively on Burwood Road, Parramatta Road, Burton Street and Loftus Street (corner of Parramatta Road). Some of the utility relocation, hoarding adjustment, concreting and driveway construction work as well as oversize deliveries must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Night work will be carried out on no more than two consecutive nights, no more than three nights per week and no more than 10 nights per month at any one location.

This night work will continue to occur in the work area shown on the map overleaf between **8pm and 5am** on **Monday, Tuesday, and Thursday nights from Monday 5 February until Friday 1 March 2024.**

Activities associated with tunnelling, including cavern excavation, haulage of excavated material and material delivery is approved for 24-hour operation seven days a week. After 10pm excavated material removal and material delivery will be using the site driveways on Parramatta Road only.

What to expect

- There may be some noise associated with the work but we will try to minimise this as much as possible
- Property and business access will be maintained at all times
- Noise blankets will be used to minimise disturbance during night work
- Saw cutting and hammering work will be completed by midnight for night work

Equipment used

Equipment used for this work includes but is not limited to: trucks, light vehicles, excavator and hammer attachment, generators, watercarts, concrete trucks, concrete saws, bobcats, elevated work platforms, jack hammers, dozers, lighting towers, vacuum trucks, vibratory rollers, concrete pumps and hand tools.

Changes to traffic, pedestrian and cyclist routes:

Traffic control will be in place to assist motorists, pedestrians and cyclists at entry and exit points to the construction site. The utility investigation work taking place in the surrounding streets will require some temporary footpath closures. Traffic control will be in place so access and two-way traffic can be maintained. Excavated material may be removed from both sites using site driveways located on Parramatta and Burwood roads as well as Burton and Loftus streets between 7am and 10pm.

Burwood North work area

Contact us:

Please contact Liz from the community team on **1800 612 173** if you have any questions, complaints or would like to provide feedback about the work. We will continue to keep you updated on the progress of work in your area. If you would prefer to receive updates by email, please send a request to metrotunnelsAFJV@transport.nsw.gov.au and we will add you to the distribution list.

Sydney Metro has launched Sydney Metro Connect – a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play. Thank you for your cooperation while we complete this essential work.
