

Construction Notification – Canterbury Station

Sydney Metro is Australia's biggest public transport project.

By 2030, Sydney will have a network of four metro lines, 46 stations and 113km of new metro rail.

Sydney Metro is revolutionising how Australia's biggest city travels, connecting Sydney's north west, south west and greater west to fast, reliable turn-up-and-go metro services with fully accessible stations.

Passenger services from Chatswood to Sydenham will commence in 2024, then onto Bankstown in 2025.

In May, work will continue along the corridor and at Canterbury Station (weather and site conditions permitting). Work will be undertaken during standard construction hours, **Monday to Friday 7am-6pm** and **Saturday 8am-6pm**. You may also notice an increase in plant and materials being removed from our sites as contractors change over along the alignment.

What work are we doing?

Location	Work during standard hours
Canterbury (along the rail corridor)	<ul style="list-style-type: none">• Site investigations, surveys and associated activities• De-vegetation and tree clearing around the rail corridor where required• Mobilisation and demobilisation of plant and materials including preparatory activities for upcoming out-of-hours work• Work related to security fence installation and combined services routes within the corridor• Parking removal and lane closures to facilitate plant and truck operation, and parking and access at various locations along the corridor• Preliminary visual inspections of the underside of bridges and adjacent overhead wiring• Installation of and modification of cable service route, cables, and trackside equipment• Local cabling, mechanical and electrical fit, linewise high voltage energisation, finishing work, surface painting and testing of padmounts• Energisation of metro services building low voltage systems via padmount
Around Canterbury Station	<ul style="list-style-type: none">• Testing and commissioning activities• Installation of equipment, cables, cable tray and cabinets in station rooms and buildings• Minor civil works on the concourse and platforms• Minor electrical and containment works at station building/platforms• Minor works on Metro services building• Testing and commissioning activities• Minor defect rectification work as required
Former Bowling Club	<ul style="list-style-type: none">• De-vegetation and tree clearing throughout the rail corridor where required• Mobilisation and demobilisation of plant and materials including preparatory activities for upcoming out-of-hours work
Substation site (off Hutton Street)	<ul style="list-style-type: none">• Installation and modification of equipment, cables and cable supports• Landscaping and remediation activities• Drainage work on Hutton Street, with temporary lane closure and traffic management in place• Traffic control to facilitate truck movements on Hutton Street, if required• Operation of transformers for testing and commissioning purposes• Cabling, mechanical and electrical fit-out and finishing works for padmounts, including testing and surface painting• Testing and commissioning of new equipment

**From time to time we may finish work later than 6pm as we complete concrete pours. This will entail finishing off poured concrete using manual and powered floats and may continue until 10pm. This may occur on up to four separate evenings during the month. The noise impact from this work will be very low.*

Out-of-hours work (night) work hours – due to the nature of some activities and for the safety of community and workers, some work will occur outside standard construction hours

Date/Time	Out-of-hours work
Upcoming rail possession:	<ul style="list-style-type: none"> De-vegetation and tree clearing around the rail corridor where required Site investigations, surveys and associated activities Mobilisation and demobilisation of plant and materials including preparatory activities for upcoming out-of-hours work
Saturday 4 May to Sunday 5 May 2024 (24/7 work)	<ul style="list-style-type: none"> Work related to overhead wiring upgrades Work related to the segregation and security fence installation within the rail corridor Parking removal and lane closures to facilitate plant/truck operation, parking and access at various locations along the corridor Installation of brackets and containments Operation of generators for testing and commissioning of padmount transformers, 24 hours per day Testing and commissioning activities Installation of equipment, cables, cable tray and cabinets in station rooms and buildings Installation of cables and trackside equipment and trackside inspections along the rail corridor Minor civil, electrical and containment works at station building/platforms Preliminary visual inspections of underside of bridges and adjacent overhead wiring
Mid-week between 6pm and 7am (for no more than 3 nights per week)	<ul style="list-style-type: none"> Site investigations, surveys and associated activities Mobilisation and demobilisation of plant and materials Utilities investigation work involving concrete saw cutting on Canterbury Road rail bridge. Traffic on Canterbury Road will be open in each direction with traffic controllers and pedestrian detours around footpath closures in place. Bus Stop on the southern footpath of Canterbury Road (Bus Stop ID 2193108) will be relocated temporarily to Bus Stop ID 2193105 Installation of cables and trackside equipment in the rail corridor Operation of generators for testing and commissioning of padmount transformers, 24 hours per day Testing and commissioning of equipment and services

What to expect

- Equipment used includes, but is not limited to excavators (including rock hammering equipment), concrete trucks and pumps, concrete vibrators, mobile cranes, elevated work platforms, loaders, rail tamper, hammer drill, rail grinder, hi-rail vehicles, generators, lighting towers, milling machine, paver, water cart, light and heavy vehicles, tippers, dump and delivery trucks, hand-held and electric tools, demolition and road saws, jack hammers, power drills, vacuum truck, asphalt paver, welding equipment, rail and circular saws and compaction equipment including a roller.
- The project team will take every step possible to minimise noise impacts, however some of this work will be noisy. A range of measures are in place to reduce noise and meet the project's approval conditions, including noise barriers, using only the necessary equipment for each task, turning off equipment when not in use and equipping machinery with non-tonal movement alarms. Respite hours will be implemented in line with the project's approvals. Highly impacted residents will be notified separately.
- Some equipment may be transported outside of standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.
- Access to buildings and driveways will be maintained at all times.

Thank you for your cooperation and understanding while we complete this essential work.
