

# Silica dust in heavy plant cabins

Dust in truck cabin.

## The problem

Mud on clothing and boots dries out and turns to dust.

Dust gets on the floor and into the fabric in the seat and when you sit down, the dust can get into the air.

Cleaning out cabins with brooms causes dust to get in the air.

## The solution

Use leather seats or use non-fabric seat covers.

Maintain air filtration systems regularly.

Regularly clean out the cabin by using wet methods or HEPA vacuum (Class H).

Cleaning fabric seats with a wet vacuum.

Leather seats.
