

Notification – St Marys

Station Boxes and Tunnelling

23 July 2024

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the Western Sydney Aerotropolis in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport open for passenger services.

CPB Contractors Ghella (CPBG) are completing the station boxes and tunnelling works for Sydney Metro – Western Sydney Airport.

Construction activities

CPBG will be demobilising the portion of St Marys construction site currently occupied to support tunnel boring machine retrieval works. Works include the removal of site amenities, the demobilisation of a 45 metre tower crane and the reinstatement of the temporary bus interchange facilities. Please see the map overleaf for the work location.

Most work will be carried out during standard construction hours **Monday to Friday 7am to 6pm and Saturday 8am to 1pm**. Some out-of-hours work activities will be carried out to mitigate quality and safety risks, and in line with the project Environment Protection Licence, Road Occupancy Licences, and Transport for NSW requirements.

Out-of-hours work

Work activities at the temporary bus interchange and St Marys work site during extended hours **Monday to Friday 9pm to 5am** from **Monday 29 July to Monday 5 August** will include:

- Removal of temporary barriers and reinstatement of jersey kerbs
- Removal of ATF panels and reinstatement of site boundary timber hoarding
- Removal of asphalt either side of the median kerb
- Reinstatement of street lights, security cameras and street furniture in Station Street
- Reinstatement of bus stops and services
- Reinstatement of the 'kiss & ride' zone to the permanent location in Nariel Street.

During the work, traffic control and signage will be in place to assist motorists, pedestrians, and cyclists with any changes to traffic conditions. This may include intermittent lane closures and stop-slow traffic controls. The times of these changes will vary and are dependent on road authority approvals. Access to driveways and buildings will be maintained at all times.

What to expect:

- Work activities will generate noise, vibration, dust and potential light impacts at night. Mitigation measures

will be in place to minimise these impacts including noise and vibration monitoring, noise blankets, respite periods, dust suppression and directing lights away from residential properties.

- Increased worker and vehicle movements in and around the work site.

Equipment used:

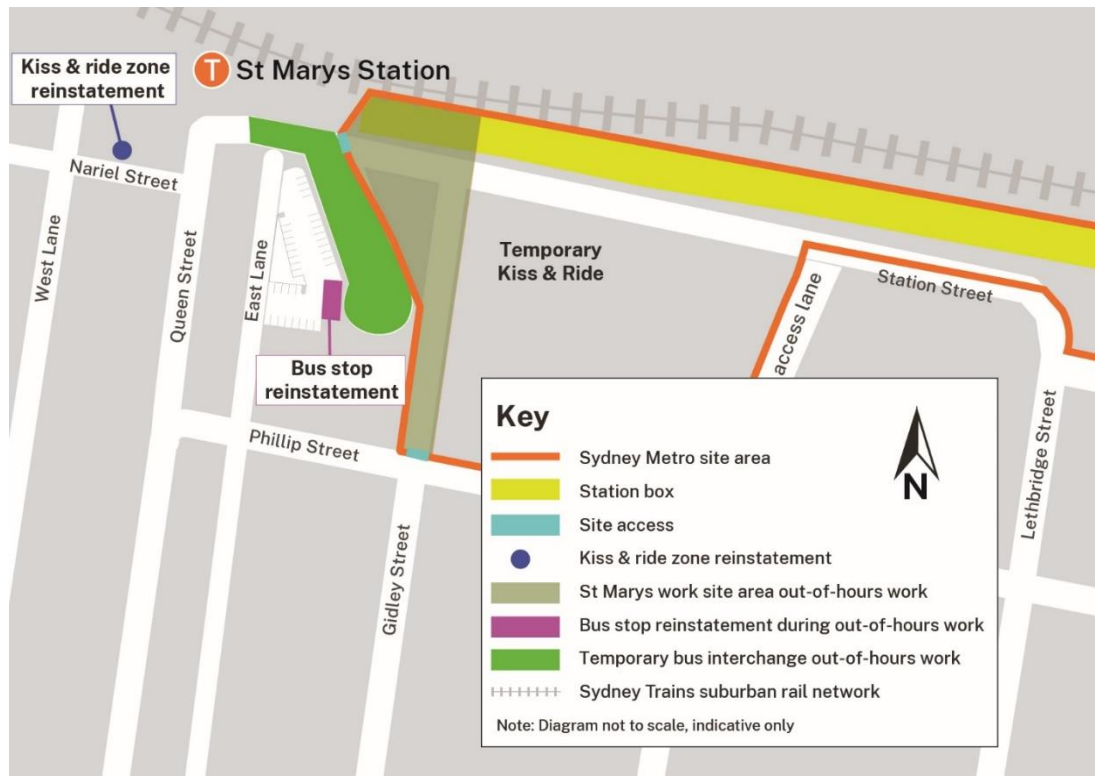

Includes (but is not limited to) mobile cranes, heavy vehicles and trailers, bobcats, telehandlers, forklifts, excavators, power generators, lighting towers, compressor, traffic management devices, power hand tools and elevated work platforms.

Feedback

We invite your feedback on appropriate respite periods or mitigation measures that may be required to your specific circumstances. Contact your local Place Manager, Michelle to discuss your preferences or to be added to the distribution list to review these updates via email.

CPBG’s Community Communications Strategy is available online at www.cpbcontractors.cc/SBTstrategy. Contact us to provide feedback on this plan. Thank you for your cooperation while we complete these essential works.

Out-of-hours work location:

Sydney Metro has launched Sydney Metro Connect – a new way to stay informed.
