

D37 Outcomes of Community Consultation Report – April - June 2024 (Q2)

Applicable to:	Sydney Metro West
Status:	Final
Version:	A
Date of issue:	31 July 2024

1. Overview

Condition of Approval (CoA) D37 for Sydney Metro West – The Bays to Sydney CBD (SSI 19238057) requires appropriate respite periods to be identified for work carried outside of standard construction hours as identified by CoA D21.

Specifically, CoA D37 states:

In order to undertake out-of-hours work outside the hours specified under Condition D21, appropriate respite periods for the out-of-hours work must be identified in consultation with the community at each affected location on a regular basis. This consultation must include (but not be limited to) providing the community with:

- (a) a progressive schedule for periods no less than three (3) months of likely out-of-hours work;*
- (b) a description of the potential work, location and duration of the out-of-hours work;*
- (c) the noise characteristics and likely noise levels of the work; and*
- (d) likely mitigation and management measures which aim to achieve the relevant NMLs under Condition D26 (including the circumstances of when respite or relocation offers will be available and details about how the affected community can access these offers).*

The outcomes of the community consultation, the identified respite periods and the scheduling of the likely out-of-hour work must be provided to the AA, EPA and the Planning Secretary.

Note: Respite periods can be any combination of days or hours where out-of-hours work would not be more than 5 dB(A) above the RBL at any residence.

This document provides the final component of condition D37 highlighted above, namely *the outcomes of the community consultation*.

This report covers the period from April to June 2024. This report has been generated from records in Consultation Manager and is provided to the AA, EPA and Planning Secretary in accordance with CoA D37. This report covers interactions triggered through consultation methods. It does not duplicate complaints received regarding out-of-hours work, rather a register of complaints is submitted separately through the DPE Major Projects Portal according to CoA B6 on a weekly and monthly basis.

The compliance matrix for all requirements of CoA D37 can be found in **Attachment A**.

Sydney Metro West Phases included in this report are:

- Phase G2 – Eastern Tunnelling Works

Addressing feedback is categorised as follows:

Further clarification provided	Additional explanation of works, such as the reasons behind why works may need to be undertaken at night, why utility outages may need to be undertaken at a particular time.
Alternative mitigation measure offered	Through consultation, these may include alternative preferences for voucher offers (restaurant, bowling etc.), alternative accommodation (AA) or a different accommodation location to that originally offered.
Ongoing consultation	Includes individual notifications of works changes or potential uptake of additional mitigation measures in the future if the stakeholder wishes to accept for future notified works.
