

Construction Notification – Marrickville Station

September 2024

Sydney Metro is Australia's biggest public transport project.

By 2030, Sydney will have a network of four metro lines, 46 stations and 113km of new metro rail.

Sydney Metro is revolutionising how Australia's biggest city travels, connecting Sydney's north west, south west and greater west to fast, reliable turn-up-and-go metro services with fully accessible stations.

The T3 Bankstown Line will close later this year for up to 12 months to complete the final metro conversion works and in 2025, Southwest Sydney will have turn-up-and-go metro services every four minutes in the peak directly into Sydney CBD.

In September, work will continue along the corridor and at Marrickville Station (weather and site conditions permitting). Work will be undertaken during standard construction hours, **Monday to Friday 7am-6pm** and **Saturday 8am-6pm**.

What work are we doing?

Location	Work during standard hours
Marrickville (along the rail corridor)	<ul style="list-style-type: none">• Site investigations, surveys and associated activities• De-vegetation and tree clearing throughout the rail corridor where required• Mobilisation and demobilisation of plant and materials• Work related to security fence installation and signalling• Parking removal and lane closures to facilitate plant and truck operation• Installation and modification of cables, cable service route (CSR) and trackside equipment• Testing and commissioning and trackside inspections• Establishment of laydown areas for temporary storage of construction materials• Temporary works on hoarding at Livingstone Road overbridge
Around Marrickville Station	<ul style="list-style-type: none">• Establishment of laydown areas for temporary storage of construction materials• Testing and commissioning of equipment and services and minor rectification work as required• Minor electrical works at station buildings and platforms• Work related to security fence installation and signalling and installation and changes to CSR• Installation of brackets and cabinets on the station platform• Installation of equipment, cables, cable tray and cabinets in station rooms and buildings• Site investigations, surveys and associated activities• Mobilisation of site compound• Parking removal and lane closures to facilitate plant/truck operation• Ongoing termination and cabling work with the station and platforms• Initial construction for an interim bike path between Marrickville and Sydenham stations
Services building site in the rail corridor, off Victoria Road	<ul style="list-style-type: none">• Mobilisation and demobilisation of plant and materials• Security fence installation and installation and modification of CSR• Ongoing termination and cabling work in services buildings• Testing and commissioning of building systems, equipment and services
Services building (off Randall Street behind Albermarle Street)	<ul style="list-style-type: none">• Mobilisation and demobilisation of plant and materials• Work related to security fence installation and signalling and installation and changes to CSR• Ongoing termination and cabling work within substation buildings• Testing and commissioning of building systems, equipment and services• Traffic control to facilitate truck movements from Livingstone Road into Randall Street as required

*From time to time we may finish work later than 6pm as we complete concrete pours. This will entail finishing off poured concrete using manual and powered floats and may continue until 10pm. This may occur on up to four separate evenings during the month. The noise impacts from this work will be very low.

Out-of-hours (night) work – due to the nature of some activities and for the safety of community and workers, some work will occur outside standard construction hours

Date/Time	Out-of-hours work
Mid-week between 6pm and 7am (for no more than 3 nights per week)	<ul style="list-style-type: none"> • Site investigations, surveys and associated activities • Mobilisation and demobilisation of plant and materials • Installation of brackets and cabinets on the station platform • Testing and commissioning of equipment and services • Utility locating and associated activities at Livingstone Road overbridge • Construction activities for an interim bike path between Marrickville and Sydenham stations • Repairing Sydney Water asset on Livingstone Road <ul style="list-style-type: none"> • Sydney Water will contact impacted residents to inform of associated water outages to allow for pipe disconnection before work commences

What to expect

- Equipment used includes, but is not limited to excavators (including rock hammering equipment), concrete trucks and pumps, concrete vibrators, mobile cranes, elevated work platforms, loaders, rail tamper, hammer drill, rail grinder, hi-rail vehicles, generators, lighting towers, milling machine, paver, water cart, light and heavy vehicles, tippers, dump and delivery trucks, hand-held and electric tools, demolition and road saws, jack hammers, power drills, vacuum truck, asphalt paver, welding equipment, rail and circular saws and compaction equipment including a roller.
- The project team will take every step possible to minimise noise impacts, however some of this work will be noisy. A range of measures are in place to reduce noise and meet the project's approval conditions, including noise barriers, using only the necessary equipment for each task, turning off equipment when not in use and equipping machinery with non-tonal movement alarms. Respite hours will be implemented in line with the project's approvals. Highly impacted residents will be notified separately.
- Some equipment may be transported outside of standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.
- Access to buildings and driveways will be maintained at all times.
- We will park our vehicles along the rail corridor where possible however, please be aware that on-street parking may be limited near worksites, particularly during planned rail possessions.

Thank you for your cooperation and understanding while we complete this essential work
