

Notification – St Marys Station footbridge

December 2024 and January 2025

Transport for NSW is delivering a new footbridge and northern plaza at St Marys Station as part of the Sydney Metro – Western Sydney Airport project.

What work are we doing?

During **December 2024** and **January 2025**, work activities will include:

- Delivering and removing materials and equipment to and from our work and laydown areas on Hobart Street, Harris Street, Glossop Street, and end of Forrester Road
- Electrical, excavation and concrete work on all platforms
- Excavation and concrete work within the site compound on Harris Street
- Utility service investigation work on Harris Street and around the multi-storey car park
- Crane and lifting operations within the Harris Street work area and on platforms.

Weekend work in December and January:

In December, some work will take place continuously during a scheduled Sydney Trains trackwork weekend. Weekend work will occur from **1am Saturday 14 December** until **10pm Sunday 15 December**. Activities during these weekends include:

- removing and delivering materials
- concreting and excavation work
- electrical work.

What to expect:

- An increase in workers and vehicles around work sites and laydown areas, and on the station platforms, especially during our weekend work.
- Traffic control and signage as required.
- There will be an increase in noise and vibration from construction machinery and equipment operating behind the construction hoarding on all platforms.

Managing our impacts:

We aim to manage our work to minimise impacts on the community and the environment. The site compound is designed with this in mind, and we achieve it by:

- installing fencing for safety and security
- reducing our noise as much as possible by turning off machinery when not in use and using temporary noise barriers where feasible.

Equipment to be used:

Equipment includes drills, demolition saws, excavators, saw cutters, dump trucks, front end loaders, vacuum trucks, semi-trailers and rigid trucks, concrete pumps, concrete trucks, mobile crane, light towers, power tools, survey equipment and hand tools.

Planned work outside of standard hours over the next three months:

Work activities including excavation, piling, concrete work, electrical work, and removal of materials are planned for the following weekends (subject to approval):

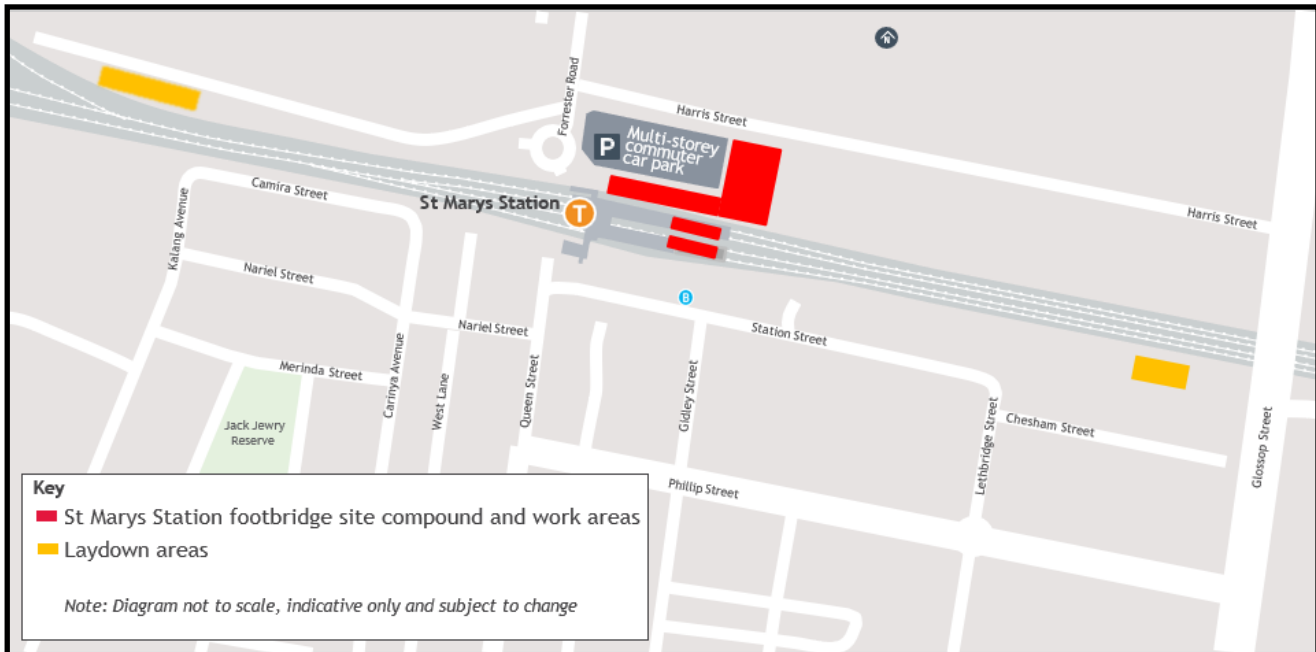

- **1am Saturday 14 December** until **10pm Sunday 15 December 2024**
- **1am Saturday 11 January** until **1am Monday 13 January 2025**
- **1am Saturday 22 February** until **1am Monday 24 February 2025**

When and where we'll be working:

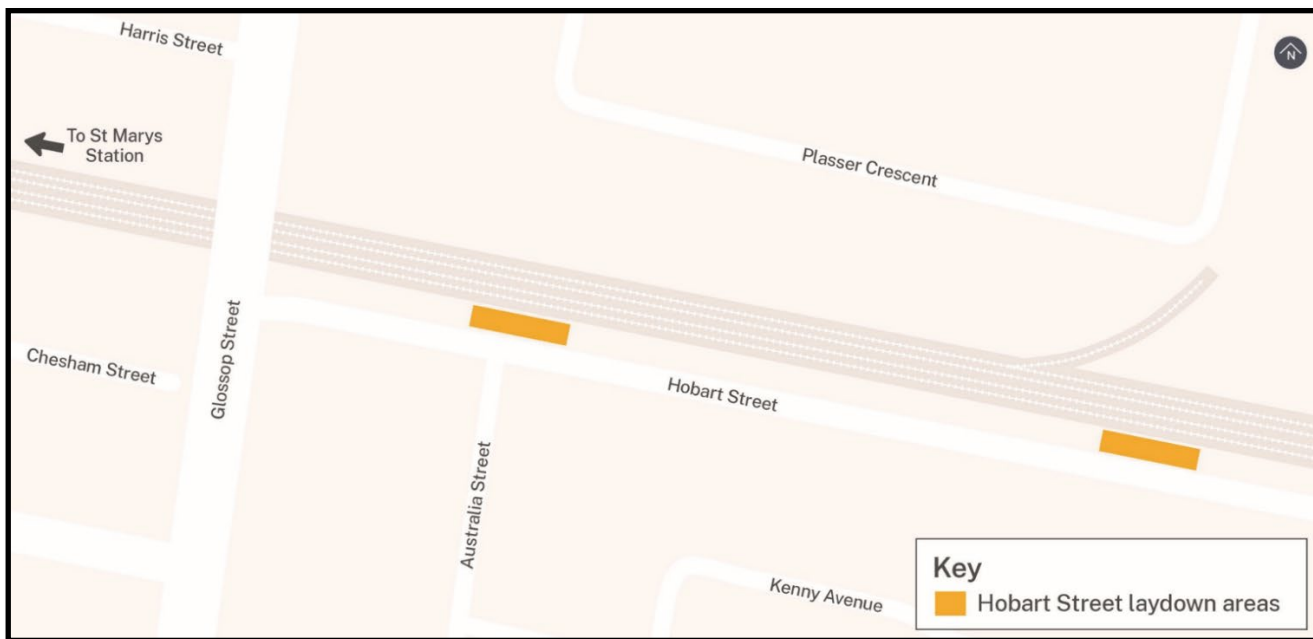

Standard working hours are **7am to 6pm, Monday to Friday** and **8am to 1pm, Saturdays**. Our work and laydown areas are shown on the maps over the page.
