

Monthly update – North Strathfield

27 January 2025

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Acciona Ferrovia Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including a station at North Strathfield.

Work during February

Work will continue within and around the North Strathfield Metro Station site during February. The main activities will include:

- Cross passage construction
- Removal and demobilisation of tunnel plant, material and infrastructure
- Decommissioning of site facilities
- Delivery of reinforcement, formwork and concrete and construction of the concrete lining
- Concrete pours within the station box, waterproofing and tunnel lining
- Pedestrian crossing lighting adjustment and maintenance on Queen Street
- Adjustment, maintenance and removal of fencing, scaffolding and hoarding
- Installation of utilities within the station box
- Delivery and removal of oversized equipment and plant
- Road and footpath pavement repair on Queen, Waratah and Wellbank streets and Concord Road
- CCTV inspection of sewer manholes on Queen Street
- Taking readings from previously installed groundwater boreholes

This work will be carried out during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 6pm

Work outside standard construction hours

Some of the utility work, pavement reconstruction, concrete pours, plant movements, hoarding graphics installation and maintenance, as well as plant movements, must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Night work will be carried out on no more than two consecutive nights, no more than three nights per week and no more than ten nights per month at any one location.

Activities associated with tunnelling, such as concrete pours, cross passage construction, defect repairs, removal of temporary tunnelling infrastructure and installation of underline service crossings inside the tunnel, are approved for 24-hour operation, seven days a week.

This night work will continue to occur in the work area shown on the map overleaf between **6pm and 5am on Monday, Wednesday, and Thursday nights from Monday 3 February until Friday 28 February 2025.**

What to expect

- There may be some noise associated with the work, but we will try to minimise this as much as possible

- Property and business access will be maintained at all times
- Noise blankets will be used to minimise disturbance during night work
- Saw cutting and hammering work will be completed by midnight for night work

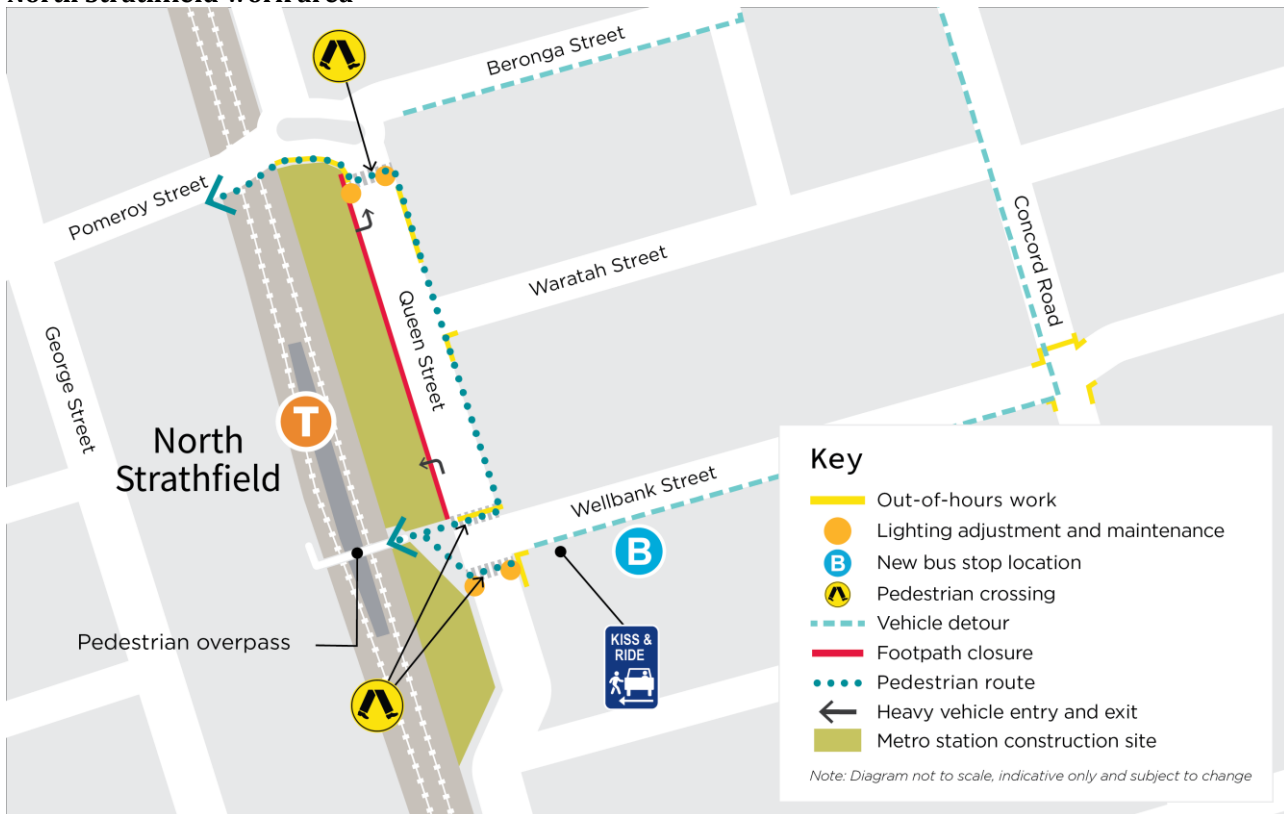

Equipment used

Equipment used for this work includes, but is not limited to: multi service vehicles, trucks, excavators with hammer attachments, rattle guns, watercarts, concrete saws, jack hammers, vacuum trucks, cranes, elevated work platforms, generators, concrete trucks and pumps, paving machines, road profilers, compactors, lighting towers, street sweeper and hand tools.

Changes to traffic, pedestrian and cyclist routes

Traffic control will be in place to assist motorists, pedestrians and cyclists at entry and exit points to the construction site. The road restoration and utility work taking place in the surrounding streets will require some temporary footpath closures and road detours. Traffic control and signage will be in place to assist motorists around this work.

North Strathfield work area
