

Monthly update – Five Dock

February 2025

Sydney Metro is Australia's biggest public transport project

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Acciona Ferroviaria Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations including a station at Five Dock.

Work during February

The main activities at the Five Dock Station sites throughout February will be site demobilisation at the eastern and western construction sites and ongoing cavern lining works, including delivery and assembly of the steel formwork and concrete pours.

Work planned for February includes:

- Construction of shaft and cavern concrete structures
- Tunnelling support activities including cross passage and central cavern construction
- Demobilising activities at the eastern construction site including shed disassembly and lifting equipment out of the site using a mobile crane
- Demobilisation activities at the western construction site including removing the existing hoarding, and replacing it with new hoarding, dismantling, and moving workforce facilities within the site and installing fencing within Fred Kelly Place
- Increased deliveries of equipment to and from the western and eastern construction sites using both sides of Great North Road, Waterview Street and Second Avenue
- Temporarily removing the public parking spaces from the front of the western construction site to assist with site demobilisation works, when required
- Delivering and removing materials and equipment (out-of-hours deliveries and removals will be notified separately).

Work hours:

Unless otherwise stated, this work will be carried out during standard construction hours:

- **Monday to Friday 7am – 6pm and Saturday 8am – 6pm**

Work outside standard construction hours:

Some work must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians, and workers.

Out-of-hours work planned for February includes:

- Pavement and footpath restoration works on Great North Road, Waterview Street and Second Avenue from **6pm to 5am on Friday 7 February 2025** (weather and site conditions permitting).
- Night work to dismantle and remove large electrical equipment from the eastern construction site using a mobile crane from Second Avenue.
- Utility works in front of the western construction site footpath on Great North Road.

- Removing large workforce facilities from the western construction site using a mobile crane. Out-of-hours work will be notified separately.

Activities associated with tunnelling support, such as concrete pours, cross passage construction, defect repairs, removal of temporary infrastructure and installation of underline service crossings inside the tunnels are **approved for 24-hour operation**. This includes activities inside the eastern acoustic shed, the excavated underground cavern and the excavated shaft on the western site (under strict noise criteria). No work is planned on the surface of the western site after 6pm unless otherwise notified.

Equipment used

Equipment used for this work includes but is not limited to: trucks, light vehicles, concrete trucks, concrete pumps, bobcat, jackhammers, elevated work platforms, excavators, street sweepers, vacuum trucks, mobile cranes, light towers, generators and power tools.

Changes to traffic, pedestrian, and cyclist routes

During the work, traffic control will be in place to assist motorists, pedestrians, and cyclists with any changes to traffic conditions. This may include contraflow lanes, stop-slow traffic controls to assist with truck movements, oversized deliveries and temporary lane or footpath closures.
