

Monthly Notification – Belmore Station

March 2025

Sydney Metro is Australia's biggest public transport project.

By 2030, Sydney will have a network of four metro lines, 46 stations and 113km of new metro rail.

Sydney Metro is revolutionising how Australia's biggest city travels, connecting Sydney's north west, south west and greater west to fast, reliable turn-up-and-go metro services with fully accessible stations.

The T3 Bankstown line between Sydenham and Bankstown was closed in September 2024 to complete the final metro conversion works and by late 2025, Southwest Sydney will have turn-up-and-go metro services every four minutes in the peak directly into the Sydney CBD. **Fare free Southwest Link buses will replace trains between Sydenham and Bankstown during this time.**

You can plan your trip at [transportnsw.info](https://transport.nsw.info) and on real time apps. Kerbside changes may also be in place around the affected train stations for temporary bus zones. Please check signage before parking your car.

Sydney Metro work during March/April

Work will continue during and outside of standard construction hours within and around Belmore Station during March/April. The main activities will include:

- Modification of cable service route, cables, overhead wire and equipment in the rail corridor, at substations and the station
- Delivery and storage of materials, including cable drums and equipment using light and heavy vehicles
- Installation of containment, cables and communications equipment in station platforms and buildings, and the rail corridor
- Energisation of equipment in stations and service buildings
- Testing, commissioning and maintenance of services and equipment across the train sub-systems in stations, and along the track corridor, including dynamic train testing activities and trackside inspections
- Installation, testing and commissioning of rail corridor security systems including CCTV, foundations, poles, outdoor equipment cabinets, solar panels, cable pits and cable containment
- Site investigations, surveys and associated activities
- De-vegetation and tree clearing throughout the rail corridor where required
- Mobilisation and demobilisation of plant and materials
- Work related to security, segregation fence installation and signalling
- Parking removal and lane closures to facilitate plant and truck operation around the station and various corridor locations
- Works at station buildings and platforms including testing and commissioning of services, electrical works, mechanical gap fillers and platform screen doors
- Track related construction activities
- Work related to wiring, high and low voltage wiring and works related to local utilities
- Work on various bridges along the corridor
- Concrete pile cap foundation and traffic barrier construction at the Burwood Road overbridge
- Establishment of site laydown at the Bridge Road carpark to prepare for installation of off-structure beam
- Installation of large beams and safety screens on one side of the Belmore Station overbridge
- Temporary traffic changes to support the work including traffic and parking changes on Bridge Road and Tobruk Avenue
- Deliveries and construction vehicle movements entering and exiting the site compound as required
- Oversized delivery of large beams and installation of screen barriers and guardrails at the overbridge
- Electrical work and testing and commissioning of services within the metro services building
- Defect rectification as required

Hours of work

Standard construction hours are Monday to Friday 7am – 6pm and Saturday 8am – 6pm excluding Public Holidays and Sundays. Some activities must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Respite hours will be implemented in line with the project's approvals. Highly impacted residents will be notified separately.

What to expect

- Equipment used includes, but is not limited to excavators (including rock hammering equipment), concrete trucks and pumps, concrete vibrators, mobile cranes, elevated work platforms, loaders, rail tamper, hammer drill, rail grinder, hi-rail vehicles, generators, lighting towers, milling machine, paver, water cart, light and heavy vehicles, tippers, dump and delivery trucks, hand-held and electric tools, demolition and road saws, jack hammers, power drills, vacuum truck, asphalt paver, welding equipment, rail and circular saws and compaction equipment including a roller.
- The project team will take every step possible to minimise noise impacts, however some of this work will be noisy. A range of measures are in place to reduce noise and meet the project's approval conditions, including noise barriers, using only the necessary equipment for each task, turning off equipment when not in use and equipping machinery with non-tonal movement alarms.
- Some equipment may be transported outside of standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.
- Access to buildings and driveways will be maintained at all times.
- We will park our vehicles along the rail corridor where possible however, please be aware that on-street parking may be limited near worksites, particularly during planned rail possessions.

Thank you for your cooperation and understanding while we complete this essential work.
