

Notification – St Marys Station footbridge

February 2025

Transport for NSW is delivering a new footbridge and northern plaza at St Marys Station as part of the Sydney Metro – Western Sydney Airport project.

What work are we doing:

During **February**, work activities will include:

- delivering and removing materials and equipment via Hobart Street, Harris Street, Glossop Street, and Forrester Road
- electrical, hydraulic, excavation, and concrete work on all platforms and within the Harris Street compound
- utility service investigations on Harris Street and around the multi-storey car park
- crane and lifting operations in the Harris Street work area and on platforms
- oversized deliveries to and from the Harris Street work area will require the temporary removal of up to 10 parking spaces during the weekend of 22–23 February.

What to expect:

- more workers and vehicles around work sites, laydown areas, and station platforms, particularly during weekend work
- traffic control and signage as required
- increased noise and vibration from machinery operating behind the construction hoarding on all platforms
- equipment to be used includes drills, demolition saws, excavators, saw cutters, dump trucks, front end loaders, vacuum trucks, semi-trailers and rigid trucks, concrete pumps, concrete trucks, mobile crane, light towers, power tools, survey equipment and hand tools.

When and where we'll be working:

Standard working hours are **7am to 6pm, Monday to Friday** and **8am to 1pm, Saturdays**. Our work and laydown areas are shown on the maps over the page.

Work outside standard construction hours:

To realign the kerb and lane in the multi-storey car park driveway, night work will take place from:

- **7pm to 5.30am Sunday 2 February to Friday 7 February**

For safety, this will be done at night when commuter traffic is minimal, with car park access maintained throughout. Key activities include:

- breakout of existing kerb
- pouring new kerb and installing new road base
- asphalt rectification work to reinstate area.

Additionally, in February, some work will take place continuously during scheduled Sydney Trains trackwork weekends. Work is planned from **7am to 3pm on Saturday 8 February** and from **1am Saturday 22 February to 4am Monday 24 February**. Key activities include:

- removing and delivering materials
- concreting, excavation, and reinforcement work
- electrical and hydraulic work.

Managing our impacts:

We aim to minimise impacts on the community and environment. The site compound is designed with this in mind by:

- installing fencing for safety and security
- reducing noise by turning off machinery when not in use and using temporary noise barriers where feasible.

Planned work outside of standard hours over the next three months:

Planned work activities (subject to approval) include excavation, concrete work, electrical work, and removal of materials on the following dates:

- Saturday 8 March to Sunday 9 March
- Saturday 22 March to Sunday 23 March
- Saturday 3 May to Sunday 4 May.
